

The online adventure

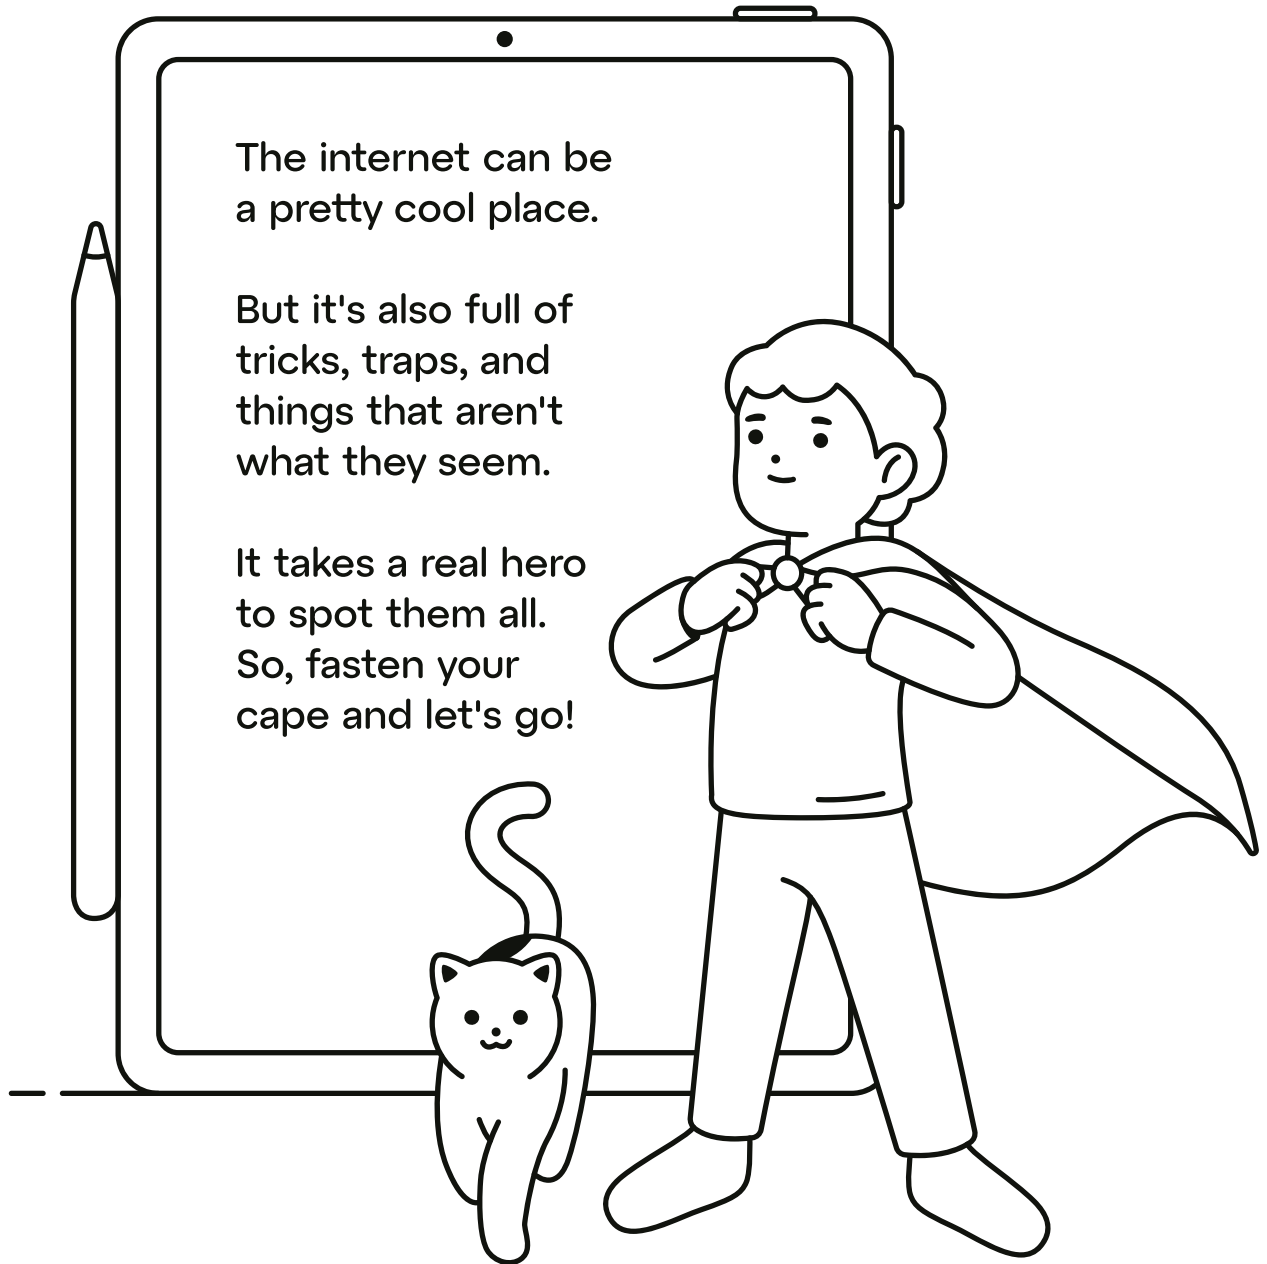

Coloring book

The internet can be
a pretty cool place.

But it's also full of
tricks, traps, and
things that aren't
what they seem.

It takes a real hero
to spot them all.
So, fasten your
cape and let's go!

MISSION 1:

Be a password pro

Team up with your mom and dad to create a strong password — just like making a smoothie! Blend letters, numbers, and special characters... Yum!

MISSION 2:

Play it safe

Some online videos show cool-looking stunts and challenges that are actually very dangerous. Don't try to copy them — just swipe away and stay safe!

MISSION 3:

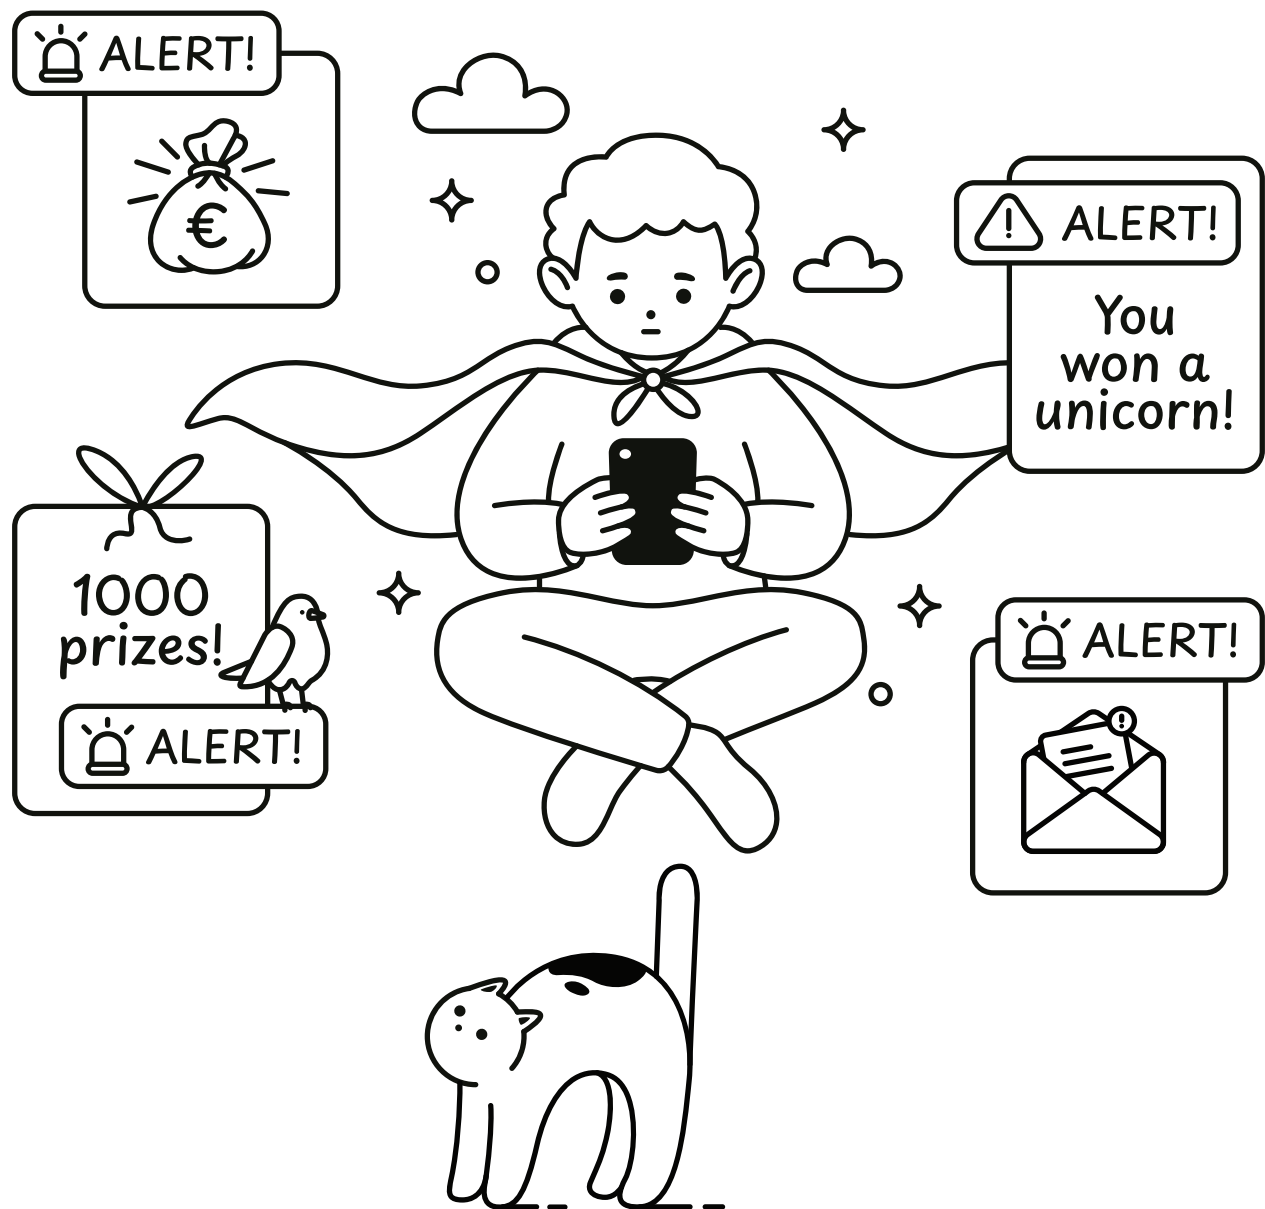

Share with care

Never reveal your real name, phone number, or school online. Keep your private information hidden – like a secret treasure!

MISSION 4:

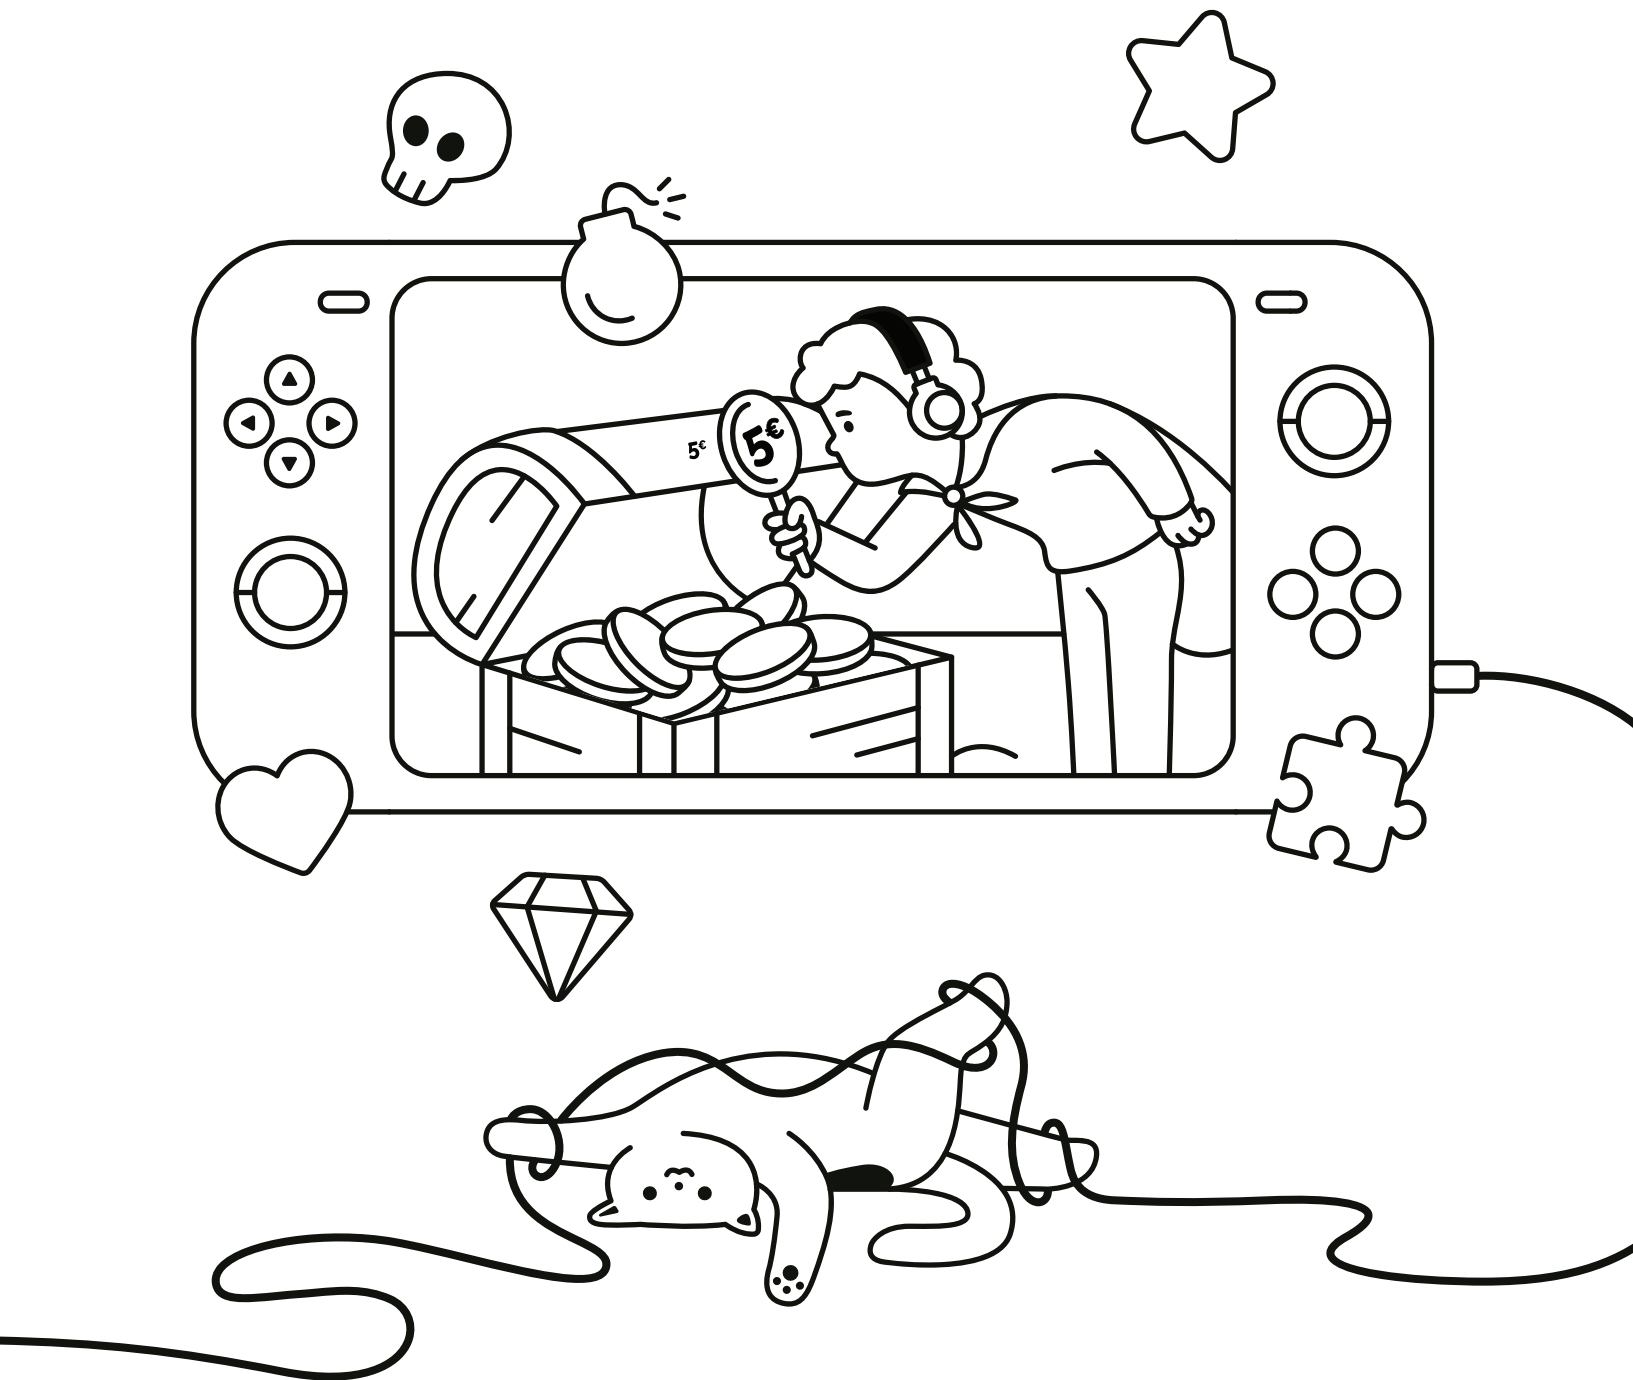

Think before you click

If a website promises a prize or a free toy out of nowhere, it is a trick. Real prizes don't just pop up on your screen!

MISSION 5:

Pause before you pay

Some games try to trick you into spending real money. Always ask a parent before clicking "buy" or opening a special prize chest, even if it looks free!

MISSION 6:

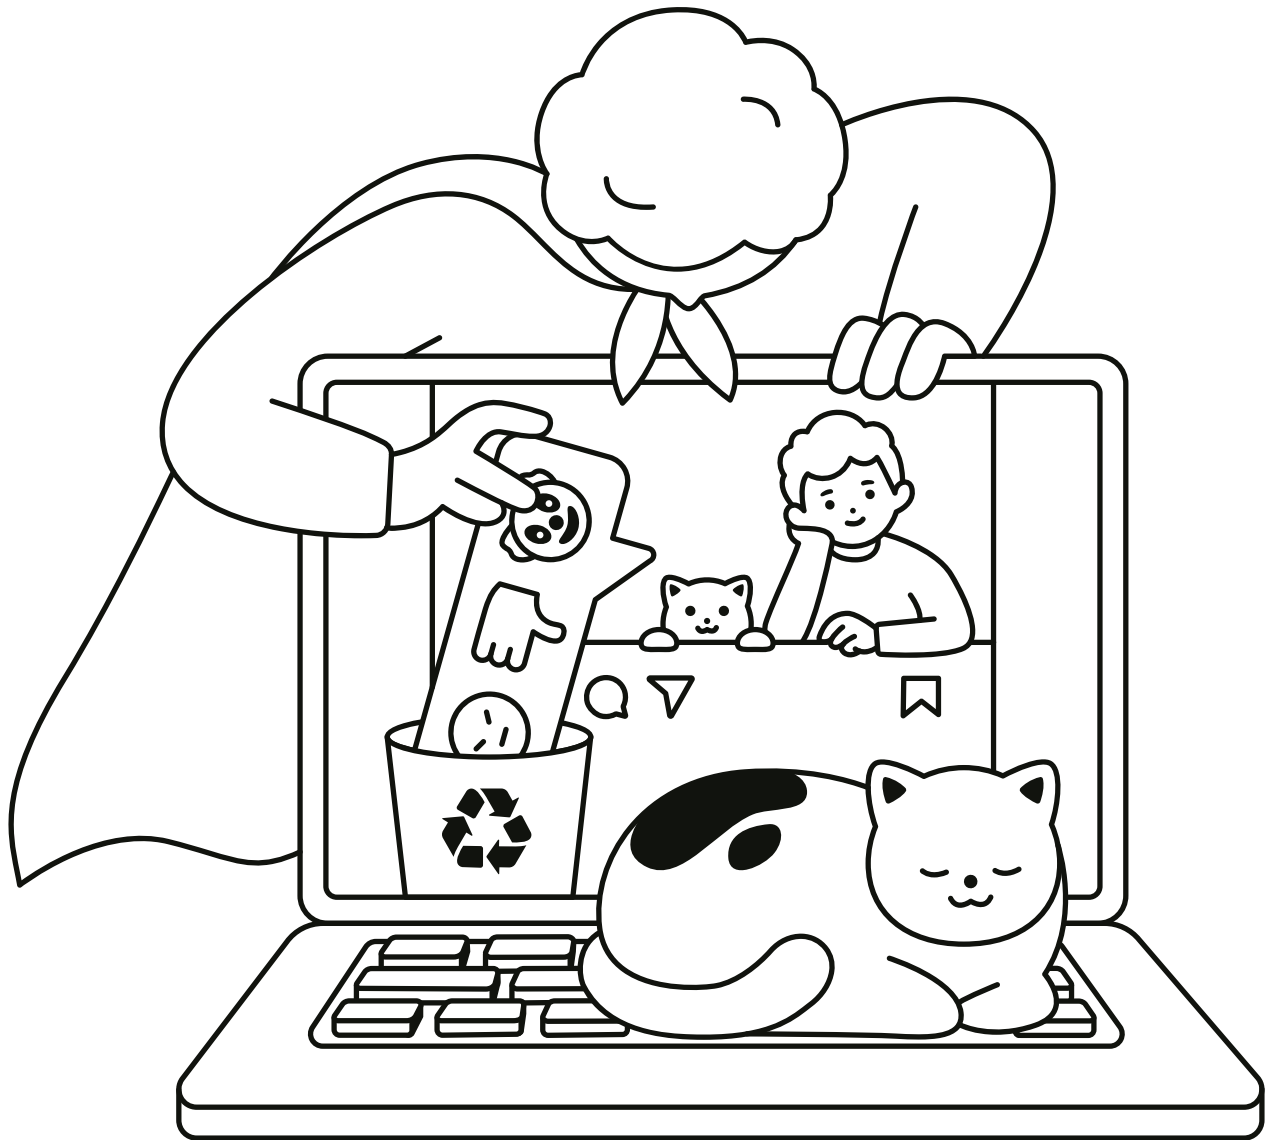

Stick to who you know

It's fun to have lots of friends, but online you should only accept friend requests from people you know and trust in real life.

MISSION 7:

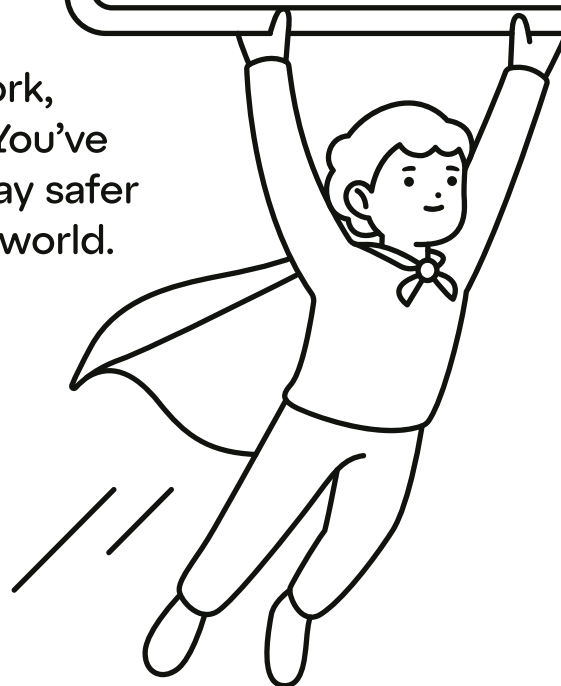

Keep it kind

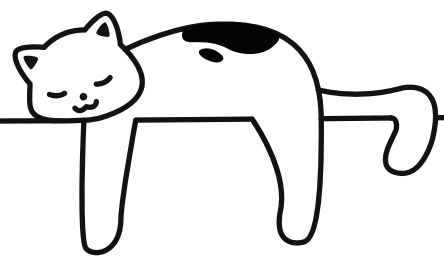

If you see someone being mean online, don't join in. A hero's move is to block mean comments and tell a grown-up what happened.

Awesome work,
digital hero! You've
learned to stay safer
in the digital world.

The internet is an
amazing place for
learning, games, and
talking to friends as
long as you use these
seven super skills.

Keep this book nearby, and share it with
your friends. And remember: If something
feels wrong online, it probably is – so
pause and ask for help.

Now go out there, have
incredible digital adventures,
and stay cyber safe!
